SUMMARY

I'm excited to bring my coding and problem solving skills to a Software Development role, where I can contribute to Improving Systems performance and solving software development challenges, Quick to adapt to new environments and work effectively in team, Eager to expand my knowledge and skills in data analysis and business intelligence. Eager to contribute to impactful projects through an internship or entry-level role while continuously enhancing my technical expertise and problem-solving abilities.

EDUCATION

B.E Computer Science Engineering Akshaya College of Engineering And Technology Coimbatore, Tamil Nadu.	Nov 2023- 27 Present 7.54 CGPA
Higher Secondary School Certification RKR. Grks.Matric and Higher Secondary School Udumalpet, Tamil Nadu	May - 2023 70%
Secondary School Leaving Certification RKR. Grks.Matric and Higher Secondary School Udumalpet, Tamil Nadu	Mar - 2021 80%

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, Python, SQL
Design Tools: Canva
Developer Tools: VSCode
Deployment Tools: GitHub
Database: MongoDB.
Frameworks/Libraries:
React.js, Node.js.

INTERNSHIPS

Cloud Azure Intern – Globe Pvt Ltd., Coimbatore - Gained hands-on experience in Cloud azure and visualization - Skilled in Cloud Architecture, Automation, Monitoring, and cost optimization. - Learned to manage cloud environments using Azure Portal,DevOps Tools	June 2025 - July 2025
Cyber Security Operations – Hackup Technology Pvt Ltd.,Coimbatore - Learned the basics of cybersecurity and cyber threats. - Understood how to detect and respond to security incidents. - Gained hands-on experience with basic cybersecurity tools and techniques.	December2025

PROJECTS

Student Complaint Management System : - Developed a web-based system to streamline the process of submitting, tracking, and resolving student complaints. .Implemented features like status tracking, notifications, and secure user authentication to improve transparency and response time	April - 2024
Women Safety bot : - Developed an AI-powered women safety system that provides real-time emergency support through SOS alerts, live location tracking, and instant communication with trusted contacts. - Implemented features like voice-triggered alerts and automated emergency response to enhance user safety. Designed to improve quick assistance and ensure security in critical situations.	Nov - 2024

AI-Powered Fraud Detection System for Blockchain Wallets:

Present

An advanced fraud detection system leveraging AI and blockchain analytics to enhance financial security.

- Developed a machine learning-based fraud detection model to analyze transaction patterns and identify suspicious activities in blockchain wallets.
- Implemented Flask for the backend, integrated with a React-based frontend to display real-time fraud alerts.
- Enhanced security by leveraging blockchain transaction tracking, anomaly detection, and risk scoring techniques
